LINK

Learning, Inquiry, Nutrition, Knowledge

LINK is time built into the schedule for opportunities for support, enrichment and independent organization, homework, or reading for the majority of students. The time is separated into two blocks: lunch for most students and an assigned LINK location. Students will have the option to sign up to participate in Open Gym and/or extension activities in the library during their LINK period.

Learning, Inquiry, Nutrition, Knowledge

When not in LUNCH, students are assigned a LINK location to complete homework, organization of materials, projects or reading. Students need a LINK pass from a teacher to go to a support or enrichment location.

STING

STING was created as a support system to hold students accountable for the completion of the assigned classwork/homework. Via STING, we send the message to every student that we have high expectations for learning and place an importance on classroom/homework assignments as a means to success in each course.

STING Procedures:

- Teacher will assign and give students a pass to STING.
- Students will report to STING (Career Center) with required work after going through the lunch line.
- STING supervisor will mark attendance and assist with questions/help if students need support to complete assignment.
- > Completed work will be placed in teacher mailbox in the main office by STING supervisor.
- Supervising Sting staff will notify the main office and teacher of record via email if a student does not report to the assigned STING time.
